| Vibration          | Appearance : No abnormal exterior appearance                                    | 5g's for 20min., 12cycles each of 3 orientations,                    |  |  |  |  |  |
|                    | Capacitance Change Within ±10 %   | Use 8"×5" PCB 0.031" Thick 7 secure points on one long side          |  |  |  |  |  |
|                    | Tan δ, IR : Initial spec.   | and 2 secure points at corners of opposite sides. Parts mounted      |  |  |  |  |  |
|                    |   | within 2" from any secure point. Test from 10~2,000Hz.               |  |  |  |  |  |
|                    |   | Initial Measurement 2*   |  |  |  |  |  |
|                    |   | Final Measurement 5*   |  |  |  |  |  |
| Resistance to      | Appearance : No abnormal exterior appearance                                    | preheating: 150°C for 60~120 sec.                                    |  |  |  |  |  |
| Solder Heat        | Capacitance Change Within ±10 %   | Solder pot : 260±5°C, 10±1sec.                                       |  |  |  |  |  |
|                    | Tan δ, IR : Initial spec.   | Initial Measurement 2*   |  |  |  |  |  |
|                    |   | Final Measurement 3*   |  |  |  |  |  |
| ESD                | Appearance : No abnormal exterior appearance                                    | AEC-Q200-002 or ISO/DIS10605   |  |  |  |  |  |
|                    | Capacitance Change Within ±10 %   | Initial Measurement 2*   |  |  |  |  |  |
|                    | Tan δ, IR : Initial spec.   | Final Measurement 4*   |  |  |  |  |  |
| Solderability      | 95% of the terminations is to be soldered                                       | a) Preheat at 155°C for 4 hours, Immerse in solder for 5s at 245±5°C |  |  |  |  |  |
|                    | evenly and continuously   | b) Steam aging for 8 hours, Immerse in solder for 5s at 245±5 °C     |  |  |  |  |  |
|                    |   | c) Steam aging for 8 hours, Immerse in solder for 120s at 260±5      |  |  |  |  |  |
|                    |   | solder : a solution ethanol and rosin                                |  |  |  |  |  |
| Electrical         | Capacitance : Within specified tolerance  | *A capacitor prior to measuring the capacitance is heat treated at   |  |  |  |  |  |
| Characterization   | Tan δ : 0.025 max.  | 150 +0/-10°C for 1hour and maintained in ambient air for 24±2 hours  |  |  |  |  |  |
|                    | IR(25℃): More than 10,000 № or 500 №× <i>μ</i> F                                | The Capacitance / D.F. should be measured at 25 ℃,                   |  |  |  |  |  |
|                    | Whichever is smaller  | 1 kHz ± 10%, 1 ± 0.2 Vrms  |  |  |  |  |  |
|                    | IR(125 $^{\circ}$ C) More than 1,000 $^{M\Omega}$ or 10 $^{M\Omega}\times\mu$ F | I.R. should be measured with a DC voltage not exceeding              |  |  |  |  |  |
|                    | Whichever is smaller  | Rated Voltage @25℃, @125℃ for 60~120 sec.                            |  |  |  |  |  |
|                    | Dielectric Strength   | Dielectric Strength : 250% of the rated voltage for 1~5 seconds      |  |  |  |  |  |
| Board Flex         | Appearance : No abnormal exterior appearance                                    | Bending to the limit, 3 mm for 60 seconds 1*                         |  |  |  |  |  |
|                    | Capacitance Change Within ±10 %   | Initial Measurement 2*   |  |  |  |  |  |
|                    |   | Final Measurement 5*   |  |  |  |  |  |
| Terminal           | Appearance : No abnormal exterior appearance                                    | 2 N, for 60 sec.   |  |  |  |  |  |
| Strength(SMD)      | Capacitance Change Within ±10 %   | Initial Measurement 2*   |  |  |  |  |  |
|                    |   | Final Measurement 5*   |  |  |  |  |  |
| Beam Load          | Destruction value should be exceed 8 N  | Beam speed: 0.5±0.05 mm/sec  |  |  |  |  |  |
| Temperature        | X7R   |  |  |  |  |  |  |
| Characteristics    | From -55 $^{\circ}$ to 125 $^{\circ}$ , Capacitance change shou                 | ld be within ±15%  |  |  |  |  |  |

### D. Recommended Soldering method :

Reflow ( Reflow Peak Temperature : 260 +0/-5°C, 30sec. ), Meet IPC/JEDEC J-STD-020 D Standard

- \*1 : The figure indicates typical specification. Please refer to individual specifications.
- \*2 : Initial measurement : Perform a heat treatment at 150 +0/-10  $^{\circ}\mathrm{C}$  for one hour after soldering process. and then let sit for 24±2 hours at room temperature. Perform the initial measurement.
- $^{\star}3$ : Final measurement : Let sit for 24 $\pm$ 2 hours at room temperature after test conclusion, then measure.
- \*4 : Final measurement : Perform a heat treatment at 150 +0/-10 °C for one hour after soldering process. and then let sit for 24±2 hours at room temperature. Perform the initial measurement.
- \*5 : Final measurement : Let measure within 24 hours at room temperature after test conclusion.

A Product specifications included in the specifications are effective as of March 1, 2013.

Please be advised that they are standard product specifications for reference only.

We may change, modify or discontinue the product specifications without notice at any time.

So, you need to approve the product specifications before placing an order.

Should you have any question regarding the product specifications, please contact our sales personnel or application engineers.

# Disclaimer & Limitation of Use and Application

The products listed in this Specification sheet are **NOT** designed and manufactured for any use and applications set forth below.

Please note that any misuse of the products deviating from products specifications or information provided in this Spec sheet may cause serious property damages or personal injury.

We will **NOT** be liable for any damages resulting from any misuse of the products, specifically including using the products for high reliability applications as listed below.

If you have any questions regarding this 'Limitation of Use and Application', you should first contact our sales personnel or application engineers.

- ① Aerospace/Aviation equipment
- ② Medical equipment
- 3 Military equipment
- 4 Disaster prevention/crime prevention equipment
- ⑤ Power plant control equipment
- 6 Atomic energy-related equipment
- ① Undersea equipment
- 8 Traffic signal equipment
- Data-processing equipment
- @ Electric heating apparatus, burning equipment
- Safety equipment
- @ Any other applications with the same as or similar complexity or reliability to the applications
